EXPERIENCE

Front-End Developer

Mobiotics, (OTT Software Solution) - India

JUNE 2021 - JUNE 2023

- Led the sole ownership of a premium and diverse suite of microfrontend portals (including CMS, CRM, DRM, Auth Dashboard, etc) and played a pivotal role in their successful development, integration, and deployment for efficient app creation and management
- Responsible for maintaining and creating new features of inhouse UI library that is used throughout the product suite

System Analyst/Designer(UI/UX)

Chilindo, (E-Commerce) - Thailand

FEBRUARY 2018 - FEBRUARY 2019

- Served as a cross-department bridge, optimizing internal systems, collecting requirements and assisting small teams of developers to successfully redesign products such as the Customer Service Back Office.
- Implemented digital marketing solutions and assisted the Marketing Team to utilizing tools like Google Analytics, AdWords, and Firebase
- Played a role from conceptualization to visualization and wireframing to assisting development of the CEO's idea for a warehouse workforce management system and collaborated with remote developers and freelancers

NOTABLE PROJECTS - *(more on github)*

[mobiotics-dynamic-components](#) — *Mobiotics UI Library*

One of the authors of a public npm repo that is the common component UI library used in Mobiotics

[Malicious URL Checker](#) — *Google Safe Browsing API*

Checks URLs to determine if it's flagged as a threat
